STAMPED CONCRETE SYSTEMS

PATTERN PROFILE

MOTIVO MODERNO

PCRT MM400: The Verona

Patterned Concrete®'s PCRT MM400 is inspired by the streets of Verona, the PCRT MM400 features subtle texture variations and large-format, mix-and-match layout to create a realistic and distinctive craftsman feel to driveways, walkways, and public spaces. PCRT MM400 offers the end user a unique customization option of choosing from four different textures. The pattern replicates Patterned Concretes classic PCRT 1400 original Yorkstone pattern with refined texturings and slimmer joints overall creating a much more modern decorative concrete finish. Specify PCRT MM400 for a sleek and modern hardscape.
